3. SETTINGS
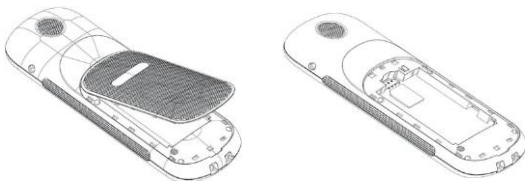

1. FIRST STEPS

First, make sure your phone is powered off. If not, long press the red key
to switch it off

1.1 Inserting a SIM card

Remove the battery cover.
Insert the MicroSIM card as indicated on the image below.

WARNING: If you have a NanoSIM, you need to use a MicroSIM adaptater.

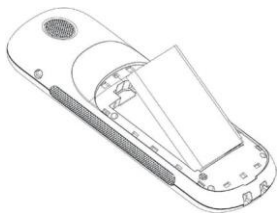

NanoSIM   MicroSIM   SIM

1.2 Inserting the battery

Remove the battery cover.

Place the battery as indicated on the image below.

Replace the battery cover on the phone.

1.3 Charging your phone

To charge your Mobiphone, place the phone on its cradle as indicated below.

1.4 Switching on your phone

Press and hold the red key to switch on the phone.

1.5 Using the keyboard

To see the menus of the phone, press the validation key.

Use the navigation pad to move across the menus.

1.6 Understanding the battery charge level

To see the battery charge level, refer to the battery icon in the upper right corner. The battery level is displayed as such:

The battery icon flashes if the battery charge level is low. Once the icon started flashing, you can still use the phone for about an hour. We advise you to put the phone back on its craddle to charge it.

2. DAILY USES

All the basic tasks are explained in this section.

These are the tasks:
- Launching a call
- Opening the call log
- Writing an SMS
- Opening inbox
- Opening sent messages
- Adding a contact
- Calling voicemail

2.1 Launching a call

To launch a call, you can directly dial a number or choose a contact in the
Phonebook.

2.1.1 Dialing a number

To make a call, dial a number and press the green key .
As this is on the mobile network you will have to dial the area code of the number
you are wanting to call, same as if you are calling from a mobile.
If you would like to call local numbers without entering the area code you need to
enter your area code in the call settings – Own Area Code (see settings 3.5.1).
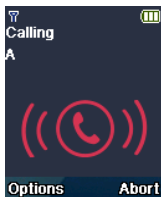

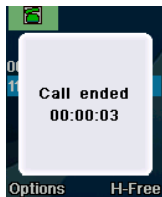

2.1.2 Calling a contact

To call a contact

Select **Phonebook** in
the menus.

Select a contact.

Press the green
key [green key] or select
Options and select
**Call**.

Press the red key
[red key] to hang up

## 2.2 Opening your call log

To open your call log
